Mobile Self Checkout

INNOVATIVE CHECKOUT SYSTEMS FOR MAXIMUM EFFICIENCY IN FLOW MANAGEMENT

- Traditional conventional checkout layout. Suitable for customers with large amounts of articles.

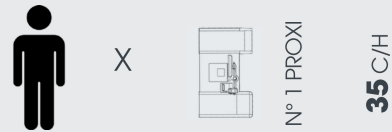

- A smaller area with SCO will attract customers with fewer articles and increase checkout flow and customer value.

- An extended SCO area with a belted EXIT Self Checkout will further improve the capacity and choice for the customer.

MoveFLOW[®]

CLASSIC

PRODUCT INFORMATION

MoveFLOW is an ideal express checkout in stores or as complementary express checkout in supermarkets, DIY stores and convenience stores. The system has a small footprint and is very clean and smart, making it easy for staff and shoppers to understand. The MoveFLOW Classic X1 & X2 and MoveFLOW Classic Mini are equipped for card payment application only. Cash payment functionality can be added in a separate standalone cash unit. MoveFLOW Classic is POS independent and fully integrated with ITAB SCO-API interface. A mix of MoveFLOW, TwinFLOW or EasyFLOW is often recommended to create sufficient capacity for a mixture of basket-to-bag and trolley size sales.

MoveFLOW **CLASSIC** X1 & X2

MoveFLOW Classic is designed to work efficient in most basket-to-bag scenarios. Depending on store layout and customer patterns, there is a MoveFLOW Classic version that suits the situation

MoveFLOW **CLASSIC** Mini

MoveFLOW Classic Mini with its small footprint is ideal in environments where there is limited space or where average purchases consists of very few items such as convenience stores, kiosks or pharmacies.

MAIN FEATURES MOVEFLOW CLASSIC

Custom Colouring:

MoveFLOW Classic can be delivered in any colour or multiple colours to match every type of customer requirement.

Light Tower:

MoveFLOW Classic can be equipped with various light towers depending on customer requirements. Choose between ITAB's own solutions, or select a different standard solution available on the market.

Card Payment:

MoveFLOW Classic can be equipped with card payment only. Cash payment functionality can be added in a separate standalone cash unit. Integrated cash management is available in the MoveFLOW Modular units (More information available on separate sheet).

Scanner/Scale:

MoveFLOW Classic can be equipped with most common scanner/scale systems available on the market.

Safety:

MoveFLOW Classic is equipped with a self-learning scale system that will detect mistakes and attempted theft.

Bag Handling:

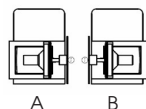

MoveFLOW Classic is compatible with bag holders for most bag types and bag sizes.

Shelving Options:

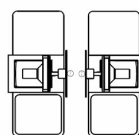

Depending on model, MoveFLOW Classic can be equipped with different shelves configurations such as bag storage etc.

MoveFLOW[®]

MODULAR

PRODUCT INFORMATION

AN IDEAL
EXPRESS
CHECKOUT!

MoveFlow is an ideal express checkout in stores or as complementary express checkout in supermarkets, DIY stores and convenience stores. The system has a small footprint and is very clean and smart, making it easy for staff and shoppers to understand. The MoveFlow Modular can be

equipped with card payment and integrated cash management. ITAB currently offer two levels of cash management systems with different speed, capacity, simplicity and security levels.

MoveFlow Modular is available in different sizes to meet any store requirement. A mix of MoveFlow, TwinFlow or EasyFlow is often recommended to create sufficient capacity for a mixture of basket-to-bag and trolley size sales.

MoveFLOW MODULAR X1

MoveFlow Modular X1 is designed to work efficient in most basket-to-bag scenarios. The unit is designed for express customers and can thanks to the modular design easily be adapted to customer requirements.

MoveFLOW MODULAR X2

MoveFlow Modular X2 is preferably used in situations where the customer needs more packing space. Thanks to the modular design, the unit can easily be adapted to customer requirements when it comes to storage possibilities and shelf combinations.

MoveFLOW MODULAR X0 (Pay station)

MoveFlow Modular X0 has an optimized footprint and is used as an express checkout or as a pay station. The MoveFlow Modular X0 can easily be adapted to customer requirements regarding scanner/scale, cash management systems etc.

MAIN FEATURES MOVEFLOW MODULAR

Custom Colouring:

MoveFLOW Modular can be delivered in any colour or multiple colours to match every type of customer requirement.

Light Tower:

MoveFLOW Modular can be equipped with various light towers depending on customer requirements. Choose between ITAB's own solutions, or select a different standard solution available on the market.

Card Payment:

MoveFLOW Modular can be equipped with several different card or card/cash solutions to meet every customer requirement (More information on cash management systems available on separate sheet).

Scanner/Scale:

MoveFLOW Modular can be equipped with most common scanner/scale systems available on the market.

Safety:

MoveFLOW Modular is equipped with a self-learning scale system that will detect mistakes and attempted theft.

MoveFLOW[®]

HYBRID

PRODUCT INFORMATION

DO YOU
WANT TO
REDUCE
QUEUEING?

Do you want to reduce queuing, minimize staff and give your express customers the option of a convenient checkout? MoveFLOW HYBRID offers the best of both conventional checkout (CCO) and self checkout (SCO).

The situation in the checkout arena can change quickly from low to high load. Therefore it is important to be able to quickly respond to peaks in customer flow.

At times, with few customers the MoveFLOW HYBRID is configured as a Self Checkout and several units can easily be operated by one attendant. The MoveFLOW HYBRID self checkouts can quickly, if necessary, be converted to manned checkouts to increase capacity and service.

The system has a small footprint and is very clean and smart, making it easy for staff and shoppers to understand.

The MoveFLOW HYBRID can be equipped with card payment and integrated cash management. ITAB currently offer two levels of cash management systems with different speed, capacity, simplicity and security levels.

All MoveFLOW systems are POS independent and fully integrated with ITAB SCO-API interface.

MAIN FEATURES MOVEFLOW HYBRID

Custom Colouring:

MoveFLOW HYBRID can be delivered in any colour or multiple colours to match every type of customer requirements.

Light Tower:

MoveFLOW HYBRID can be equipped with various light towers depending on customer requirements. Choose between ITAB's own solutions, or select a different standard solution available on the market.

Card Payment:

MoveFLOW HYBRID can be equipped with several different card or card/cash solutions to meet every customer requirement (More information on cash management systems available on separate sheet).

Scanner/Scale:

MoveFlow HYBRID is equipped with scanners and certified scale that works for both self checkout customers and assisted checkout.

Safety:

MoveFLOW HYBRID is equipped with a self-learning scale system that will detect mistakes and attempted theft.

Bag Handling:

MoveFLOW HYBRID is compatible with bag holders for most bag types and bag sizes.

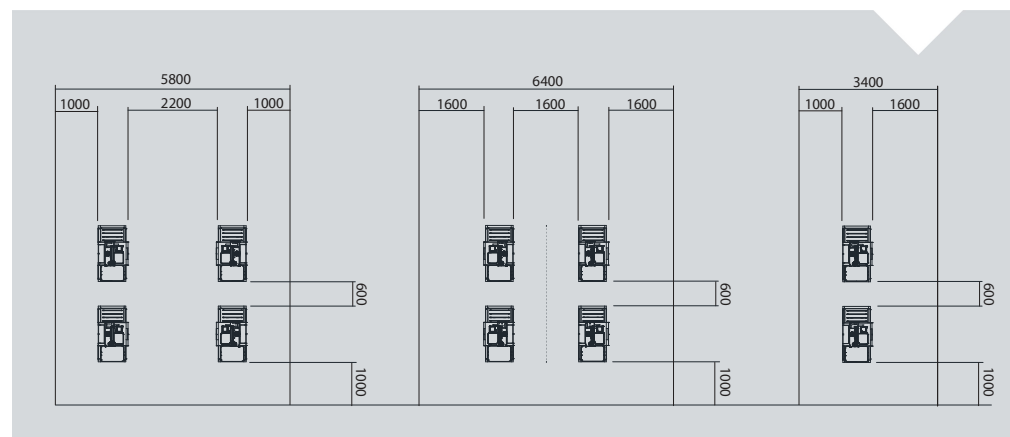

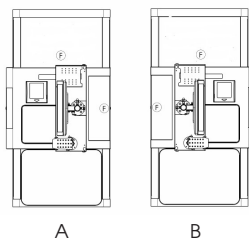

Shelving Options:

Depending on model, MoveFLOW HYBRID can be equipped with different shelves configurations such as bag storage etc.

TwinFLOW®

PRODUCT INFORMATION

TwinFLOW offers an efficient and complete Self Checkout solution. The TwinFLOW system is built to be as flexible and versatile as possible and at the same time being user friendly for both shopper, staff and service technician. The system offers all the benefits of traditional ITAB basket-to-bag systems regarding fraud prevention and self-learning weight security control but also provides additional security by methods of using optical sensors. The TwinFLOW suits both basket and trolley size shoppers and has all features required to handle different kinds of articles.

- ▶ Intuitive for customers
- ▶ Can handle two customers at the same time
- ▶ Trolley customers no longer a problem for SCO
- ▶ Double throughput potential

compared to conventional basket-to-bag systems

- ▶ Additional security features using optical sensors
- ▶ Integrated cash management

TwinFLOW **Single Lane** (TFS)

TwinFLOW Single Lane (TFS) can handle two customers simultaneously with an optimized footprint. Customer 2 can start scanning while customer 1 is still packing.

TwinFLOW **Dual Lane** (TFD)

TwinFLOW Dual Lane (TFD) can handle two customers simultaneously and offers a higher capacity packing solution.

MAIN FEATURES TWINFLOW

Custom Colouring:

TwinFLOW can be delivered in any colour or multiple colours to match every type of customer requirements.

Right / Left Independent:

The TwinFLOW TFS & TFD is symmetrical and can easily be converted to fit the store layout. This means greater flexibility and opportunities to transform the TwinFLOW for future changes.

Card/Cash Payment:

TwinFLOW can be equipped with several different card or card/cash solutions to meet every customer requirement. The Glory CI-10 and OEM cash management systems can be retro fitted.

Integrated Belt Scale:

The integrated belt-scale provides increased security and simplicity. The scale can handle multiple items simultaneously, resulting in increased flexibility, speed and robustness.

Safety:

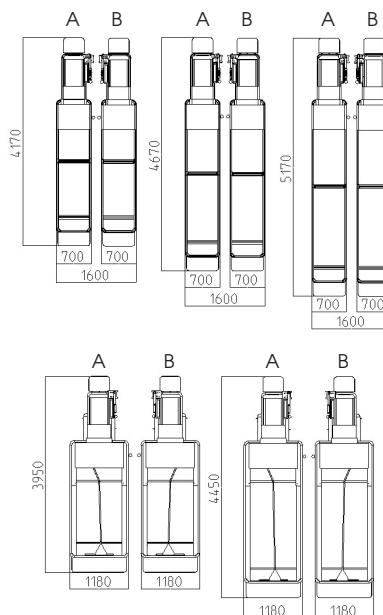

TwinFLOW is equipped with a self-learning scale system that will detect mistakes and attempted theft. It is also equipped with optical sensors for additional security.

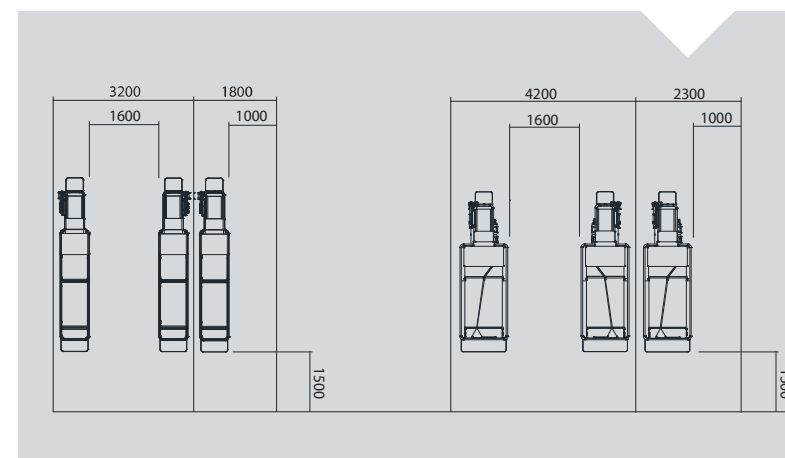

2 x Customer Handling:

TwinFLOW is a unique twin-belted solution that is capable of handling two customers with trolley size purchases simultaneously.

European Version	TwinFLOW Single Lane (TFS):	TwinFLOW Dual Lane (TFD):
Frequency:	50 Hz	50 Hz
Voltage:	230 VAC +/- 10 %	230 VAC +/- 10 %
Nominal power (in use):	450 W +/- 10%	450 W +/- 10%
Absolute maximum power:	1180 W +/- 10%	1180 W +/- 10%
Standby (All motors off, rest on):	80 W +/- 10%	80 W +/- 10%
Height:	1440 mm	1440 mm
Width:	700 mm	1180 mm
Length:	4170 mm	3950 mm
SCO Weighing range:	5 to 15000 grams	5 to 15000 grams
SCO Weighing resolution:	5 grams	5 grams

SCAN&GO

MOBILE SELF CHECKOUT

THE LINK BETWEEN PHYSICAL AND DIGITAL SHOPPING

The Scan&Go app was developed as a safe, manageable self-service alternative to automatic checkouts.

It lets customers scan items directly on their mobile devices as they walk through the aisles and allows them to pay via the app itself: a solution designed to improve the in-store consumer experience as part of a focus on frictionless shopping.

Scan&Go looks to the future of shopping in a way that's secure for retailers by posing strict limitations on fraud and inventory loss.

MAIN FEATURES SCAN & GO

Installation on customers' smartphones is not required: all they have to do is scan the **QR code** displayed in the store and start shopping

Combined with a solution for **automatic release of anti-shoplifting tags**, Scan&Go plays a crucial role in the new concept of **FRictionless Shopping**

It works like an e-commerce app. It **supports all the most common online payment methods**, from credit and debit cards to the latest digital systems

Scan&Go contributes to brand loyalty because it allows the retailer to also deliver **personalized offers** on the consumer's smartphone

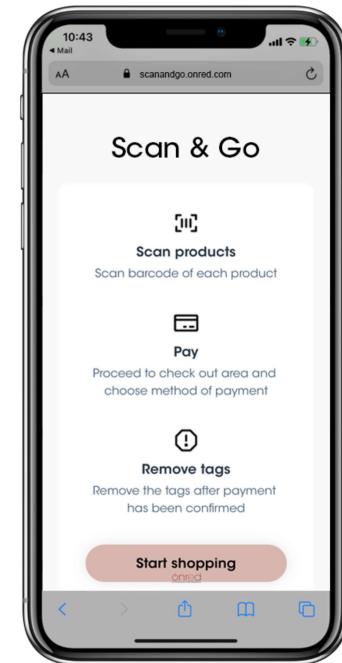

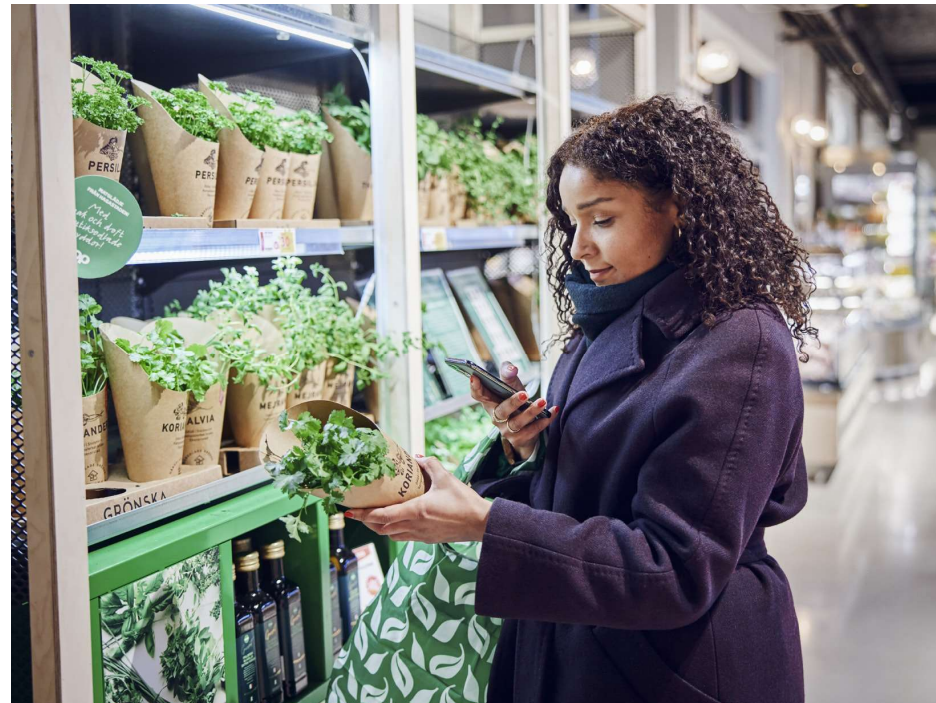

Scan&Go boosts sales because it allows retailers to engage in **cross-selling** actions by offering customers related products via the app

Benefits for the Consumer:

- Greater choice & convenience
- Zero waiting time
- Improved customer satisfaction

Benefits for the Retailer:

- Improved throughput in-store
- Brand loyalty
- Greater sales conversion
- Cost saving of space
- Lower operational cost
